## AIMS

Recent MEng graduate in Electronic and Information Engineering from Imperial College London with a strong foundation in data science, machine learning, and software development. Proficient in Python, SQL, and modern ML frameworks, with experience delivering real-world solutions through collaborative, data-driven projects. Eager to apply analytical skills to drive business insights and support product innovation in a fast-paced SaaS environment.

## EDUCATION

<b>Imperial College London</b>	Oct 2021 – June 2025
<i>MEng Electronic and Information Engineering</i>	<i>Grade: 2:1</i>
<ul style="list-style-type: none"> <li><i>Relevant modules:</i> Topics in Large Dimensional Data Processing, Deep Learning, Machine Intelligence in Finance, High Level Programming, and ML for Imaging</li> </ul>	
<b>Royal Grammar School, High Wycombe</b>	Sept 2019 – June 2021
<i>A Levels (Maths, Further Maths, Physics &amp; English Literature)</i>	<i>Grades: A*A*A*A</i>

## SKILLS

**Programming Languages:** *Python, HTML/CSS/JavaScript*  
**Machine Learning Tools:** *TensorFlow, PyTorch, scikit-learn, NumPy*  
**Development tools:** *GitHub, Docker, React, Firebase, Ubuntu, Jupyter Notebook*  
**Data Management:** *SQL, NoSQL, R*

## PROJECTS & EXPERIENCE

<b>Rabbit Hole Detector - Sundai Hackathon</b>   <i>Python, VSCode</i>	22 June 2025
<ul style="list-style-type: none"> <li>Preprocessed and analysed user search history data to identify obsessive patterns of behaviour.</li> <li>Designed frontend interface to visualise behaviour and provide diagnostic feedback with an LLM.</li> </ul>	
<b>Group Consultancy Project - Oshen</b>   <i>Python, TensorFlow, NumPy, scikit-learn, Colab</i>	May – June 2024
<ul style="list-style-type: none"> <li>Developed an embedded ML system to support sustainable marine industrial planning through cetacean detection.</li> <li>Processed raw underwater audio data into labeled spectrograms for training and evaluation.</li> <li>Designed and optimised lightweight ML models, achieving 85% classification accuracy on preprocessed data.</li> <li>Deployed models onto STM32 microcontrollers for real-time, edge inference.</li> <li>Delivered a robust solution integrated into the client's product for use in marine environments.</li> </ul>	
<b>MEng Final Year Project - Superclass Routing Network</b>   <i>Python, Jupyter Notebook</i>	Jan – June 2025
<ul style="list-style-type: none"> <li>Designed and evaluated a biologically inspired machine learning architecture with robust resource scaling capabilities.</li> <li>Identified and analysed a conflict in objective functions between the central router and submodules.</li> </ul>	
<b>Weather Station</b>   <i>Python, Firebase, HTTP/CSS/JavaScript, React</i>	February 2024
<ul style="list-style-type: none"> <li>Designed a weather monitoring device with a React frontend and Firebase backend.</li> </ul>	
<b>Forage - Accenture Data Analytics and Visualisation</b>   <i>Certificate</i>	Sept 2024
<ul style="list-style-type: none"> <li>Completed practical program on visualising business data and communicating insights with a presentation.</li> </ul>	

## EXTRA-CURRICULUM

<b>DramSoc</b>   <i>Producer, Actor, Assistant Lighting</i>	Nov 2024 – June 2025
<ul style="list-style-type: none"> <li>Involved in multiple student run theatrical productions in varying capacities, showcasing leadership and team management.</li> </ul>	
<b>ICSF Wyrmtongue</b>   <i>Chief Editor</i>	Oct 2023 – June 2025
<ul style="list-style-type: none"> <li>Published and promoted the society's biannual science fiction newsletters.</li> </ul>	
<b>Shooting Star Foundation Datathon</b>   <i>Participant</i>	Oct 2024
<ul style="list-style-type: none"> <li>Participated in a "Tech for Good" data science hackathon organised by ICDSS.</li> </ul>
